

## Short Biography Alexandros L. Zografos

**Alexandros L. Zografos** graduated as a chemist in 1996 from National University of Athens. After earning his PhD in 2001 under the supervision of Prof. Olga Igglessi-Markopoulou at National Technical University of Athens, he pursued postdoctoral studies first at The Scripps Research Institute, under the guidance of Prof. Phil S. Baran and then at Columbia University with Prof. Scott Snyder, before moving back to Greece to work as a senior researcher at National University of Athens and at NCRS Demokritos Institute. In 2009, he began his independent career at Aristotle University of Thessaloniki where currently he is Associate Professor. He is recipient of Hildegrad award of the National Academy of Athens and the Fulbright Visiting Scholar Award. His group is working on the exploration of divergent total synthesis of natural products and the development of biomimetic methodologies for the aerobic oxidation of complex substrates.
